2.MODE:

Mode is the value of the series which occurs most frequently in a statistical distribution.

-Marketers also calculate the type of ad used. For example- newspaper, T.V., digital so they can know which type of ads. their company uses most often.

SUMMARY

- Most students may dread having to deal with Math in school and even question the importance of actually taking the subjects. Though this may be the case, Mathematics actually contributes a lot to society more than it's been credited for.
- Statistics is the study that deals with the collection and analysis of data. It is mostly used to keep records, calculate probabilities, and provide knowledge. Basically, it helps us understand the world a little bit better through numbers and other quantitative information. Thus, the application of statistics is evident in our everyday activities.

Statistics In B

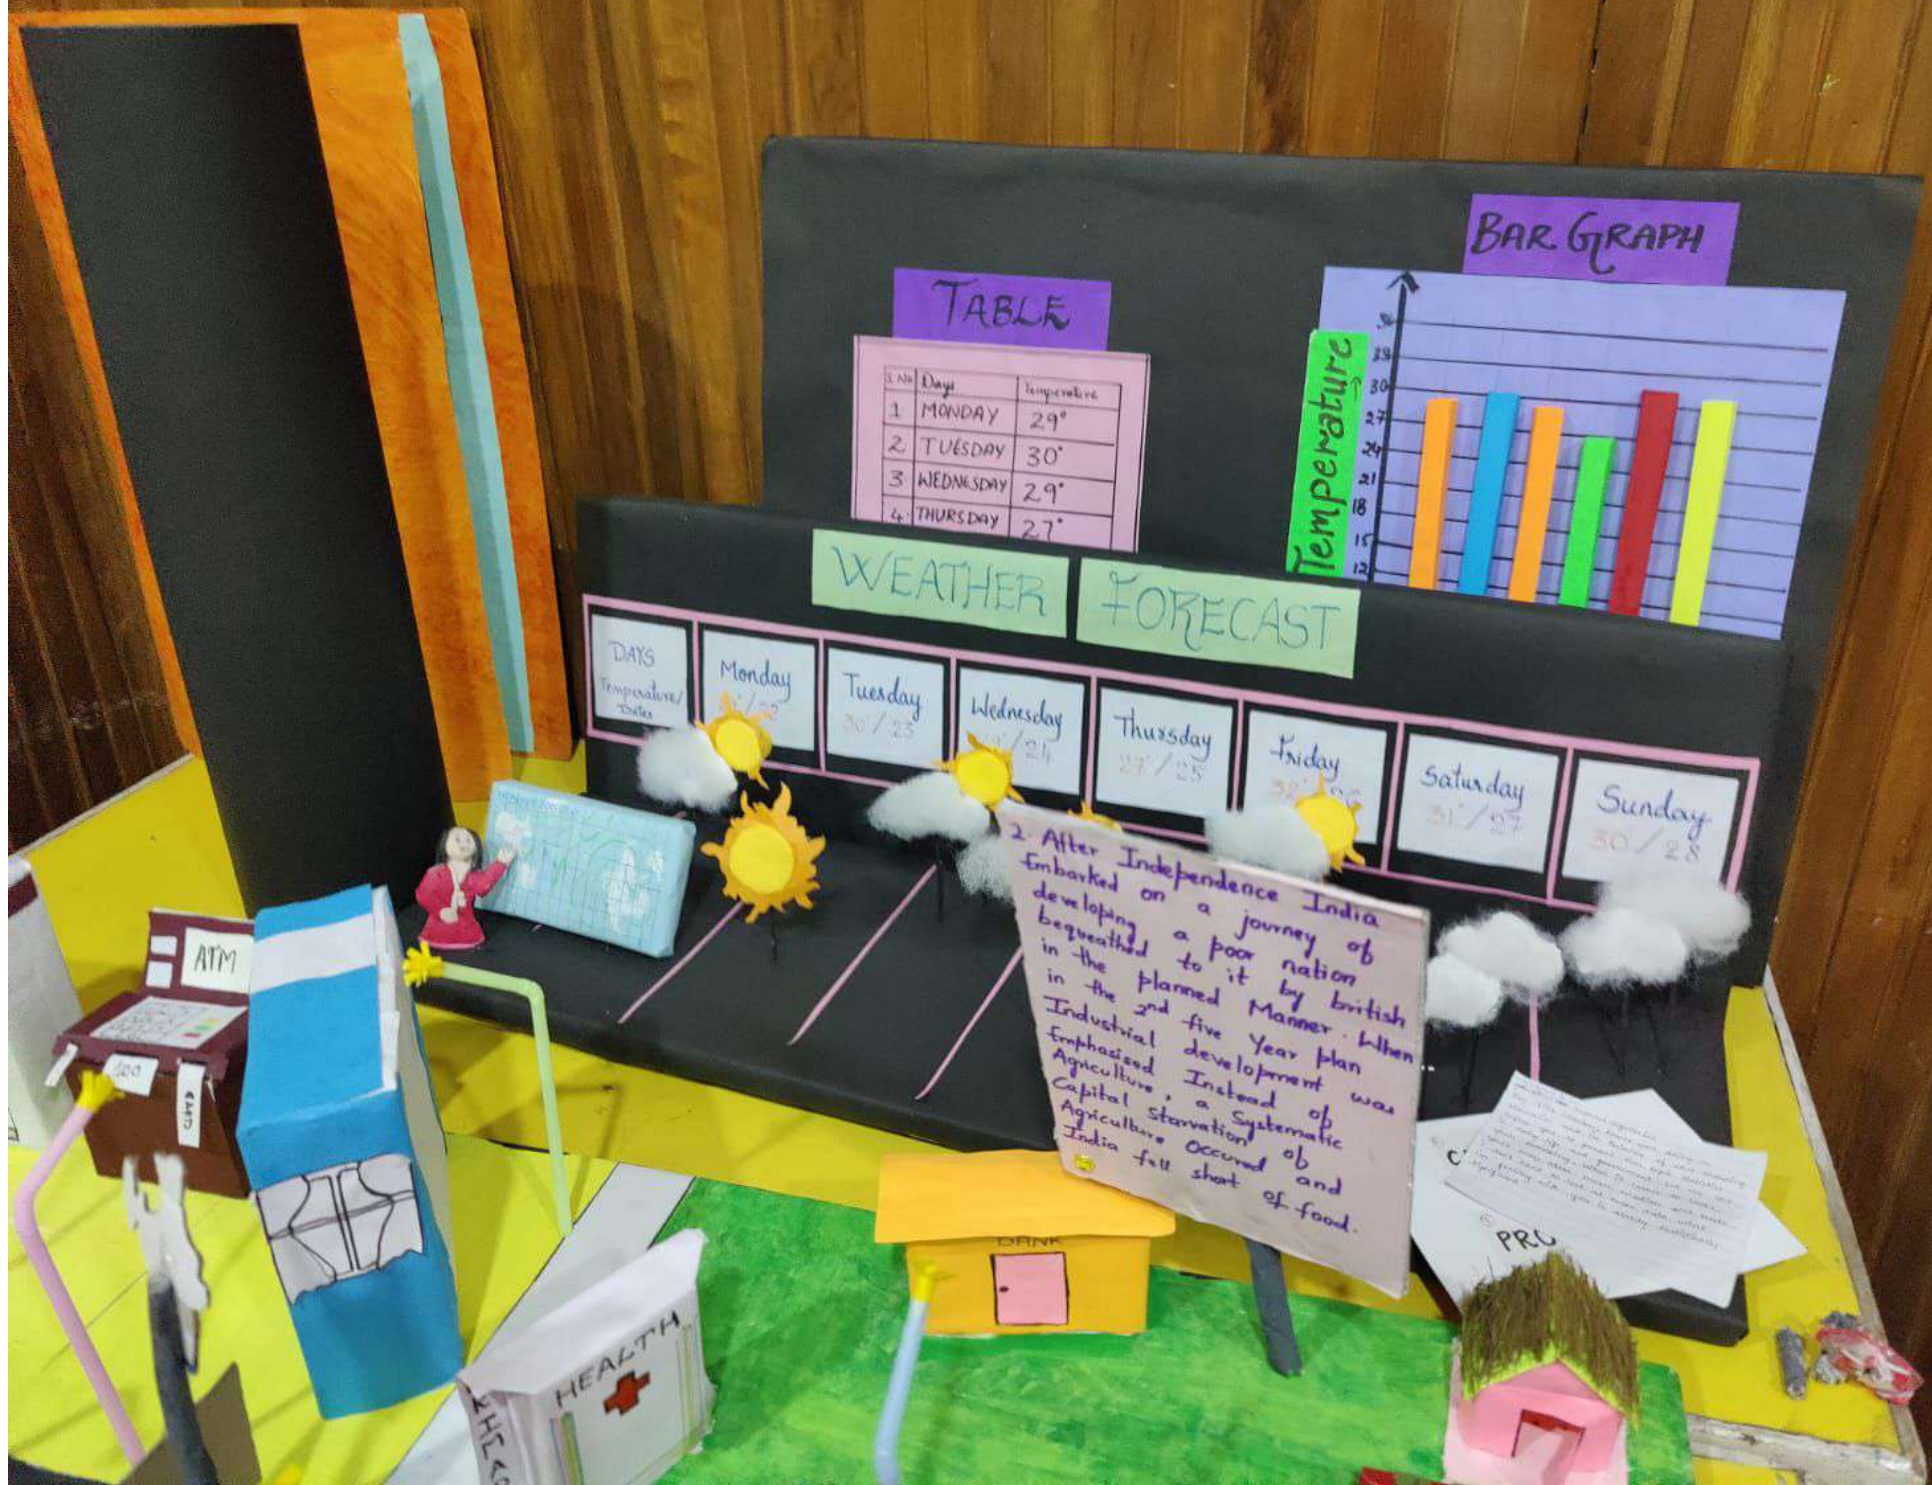

Table
The table is a simple structure made of cardboard and paper, with a pink sign on top.

After studying the table in a group of students, a few were surprised to find it to be placed there in the first place. The table was designed in a simple way, with a few pipes and a sign on top.

ADP

Handwritten notes on a white sheet of paper, possibly a blueprint or design plan, are visible on the right side of the model.

TABLE
